

Tracking Player Passes

Where are my passes?

You can track your player passes on the YSSL website through the player status on your team page.

New = the player information has been entered and saved to the player's file; it may or may not have a picture attached to the file. **After** the picture has been uploaded to the player's file and saved; click submit.

Submitted = the player's information and picture have been saved to the file and the submit button has been clicked. This player must have a birth certificate mailed, faxed or emailed to the YSSL for verification of the date of birth. The player is sitting in the Registrar's verification queue waiting for you to complete the process to add him to the team.

Pending Pass = the player either is a previous player in the YSSL and has immediately gone to the Registrar's print queue or they are new to the YSSL and have had their date of birth verified. The player is waiting for the Registrar to print their pass.

Activated = this is the place all players want to be! They have been added to the team, their pass has been printed and their name will now appear on your team roster! The date that the pass was printed will appear in the next column. All passes are mailed to the club administrator of record.
